Access Control Solutions by Access Control Professionals

ABDiIdentification System:

Photographic identification is one of the most effectively utilized access control solutions on the market today.

The use of the latest card printing technology and the unique capabilities of the **ABDi**Identification System has produced one of the most flexible tools in the **ABDi** arsenal of Access Control solutions.

Prox Cards, Barcode Label Cards and Magnetic Stripe Cards are choices available to client-communities that purchase this unique system.

The **ABDi**Identification System is available as both a stand-alone system or as a fully integrated module of **ABDi**'s Access Control System.

Employee ID, time and attendance, facility access, club membership, and special recognition, are examples of how a community can make use of photographic identification. Single-sided or double-sided cards are available to further address community concerns.

What makes the **ABDi**Identification System so special, and so popular? We believe that **ABDi** recognizes community challenges as well as any company in the United States. Combining this experience with the ability to listen to the specific needs of your community, **ABDi** entrenches itself as a most effective provider of identification cards. Our system is more comprehensive, yet still very instinctive.

If your community desires this type of solution to your access control problems, then **ABDi** is your logical choice.

We can arrange a visit to one of our client-communities so that you can see, firsthand, how **ABDi** meets and exceeds the expectations of its customers.
