Access Control Solutions by Access Control Professionals

ABDi Hosted Solutions and Leased Solutions:

In recent years community budgets have been unduly strained by economic conditions not encountered in decades. Reserves are greatly reduced, and monthly fee incomes have fallen precipitously.

ABDi is addressing slimmer association coffers by offering two distinctly different solutions that enable communities with reduced capital budgets to effectively address their gated community access control system challenges.

Hosted Solution:

ABDi has successfully introduced its Hosted Solution whereby the community can use its own computer workstations at the gatehouse and property management offices, yet still enjoy the many advantages of the **ABDi** Access Control System.

The Access Control System itself resides on **ABDi** secured servers with multiple backup and security systems and procedures that protect the community's database and keep it up and running. The community pays **ABDi** an extremely competitive and non-threatening monthly fee that includes every single characteristic and feature of the **ABDi** Access Control Systems now being used at over 500 communities across the country. All optional modules are available under this Hosted Solution and it includes the Resident Web Package which has revolutionized the industry's interface with their Access Control System.

Call now to see how this Hosted Solution can fit your budget!!

Full Service System Leasing:

ABDi has been leasing its Access Control Systems to gated communities for over fifteen years. Leases run from 36-60 months with zero down payments, competitive interest rates and varying end-of-lease options. **ABDi** finances all leases by itself so there are no additional fees or expenses relating to leasing the most comprehensive, yet most intuitive Access Control System available today. This is a full service lease so that it is covered 24x7x365 by **ABDi**.

ABDi will meet your access control system needs with a solution that matches your budget!
